Software
Document Management System

Organize . Control . Share

A complete document Management System (DMS) Managing version control and approval

Organize : the enterprise document repository

Control : the documentary system to conform to ISO 9001 requirements (Approval, Version control)

Share : your documents based on privileges

An efficient and user friendly software with competitive pricing

An interactive tool

- reminder of pending and recent document notifications on home page
- notification and approval request by email
- automatic reminder emails (settings based) for documents in progress, pending approvals or to be reviewed

To optimize document repository update.

Intuitive for end users

- document sharing based on privileges
- simple approval workflow sequential and/or parallel
- each document has it own descriptive form

To track, share, consult your documents as simply as possible

A secure system

- documents are stored in a vault
- access management at document or document set level

To protect your data and manage information accessibility
